DETAILED ACTION

1. Applicant's election without traverse of claims 1-10 for examination filed July 14, 2005 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Benefiel et al.

Benefiel et al. shows a flexible straw 212 (Column 7, lines 35-36) substantially filled with a material, the straw having tightly fitting end caps 36 (see the embodiment of Figure 6) in which the straw is formed from materials including polypropylene or polyethylene and is made to be transparent, translucent, or opaque (Column 6, lines 51-64). Regarding the various types of materials of which the straw is filled with, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Manning, Wong et al., Mead et al., and Aykanian are pertinent to Applicant's invention.
